Monograph of a number

According to the core curriculum, formation of the concept of natural number is the paramount goal of mathematical education at early school age. „Monograph of a Number” meets this goal. The set contains 21 boards with numbers from 0 to 20 and is an exhaustive introduction to numbers in the required cardinal, ordinal and measuring aspects. Besides, each board shows the handwritten and printed versions of a number with clear indication how to write the number correctly. An original task with the use of the board is to get pupils involved in physical activity. Each board has a picture to encourage children e.g. to squat down the right number of times. With the help of Monograph, a child will acquire elementary knowledge through play and by using ordinary objects from immediate surroundings.

Fractions and percentages. Magnetic set

The set consists of dividable circles and rectangles with a part painted over to help children recognize a fraction as part of a whole and match a picture with the value (vulgar and decimal fractions, percentages) it presents. The set includes a large square magnetic chessboard divided into 100 boxes and magnetic squares which match them. Pupils can practise fractions and percentages for any value in the 1 - 100 range. Magnetic fractions help to learn the basic properties of vulgar / decimal fractions and percentages, and relationships between them. It will also help children understand abstract concepts to do with operations on fractions and percentages.

230 pcs including:

- cardboard elements:
 - 9 circles D 10 cm;
 - 51 rectangles with vulgar fraction values
- magnetic elements:
 - 9 circles D 30 cm;
 - 9 rectangles with a graphic (30 x 20 cm) of a given fraction;
 - 1 chessboard 110 x 110 cm;
 - 100 squares 10 x 10 cm;
 - 51 rectangles with vulgar fraction values;
- age: 7+

NS1298

Fractions flipchart

A set of ring bound charts demonstrating the relationship between an amount in graphic form and a fraction, decimal number and percentage.

- 5 types of activity

TY0030

Wooden dice with vulgar fractions

An excellent teaching aid to explain vulgar fractions and mathematical operations on them. Each side of the dice presents a different fraction value. Each value appears several times, thus enabling operations.

- 28 pcs in 4 colours
- size: 2.5 x 2.5 x 2.5 cm
- material: wood
- age: 3+

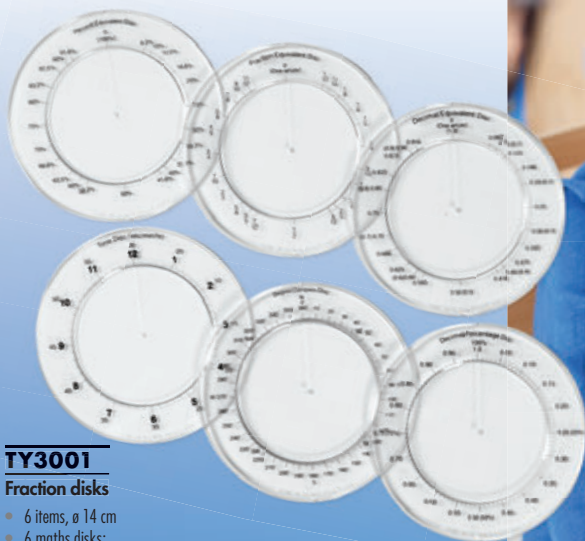

fraction disks

A set of 6 transparent disks with fractions to perform, compare and size imaging. It makes it easier to understand fractions and different ways of writing parts of the whole. Putting the disks on each other can illustrate the

principle of converting fractions into percentages and vice versa. It allows you to easily present the concept of equivalence - percentages can be represented by ordinary and decimal fractions.

TY3001

microscopes

The microscopic world is a mysterious and fascinating environment rich in live organisms invisible to the human eye. We can explore its nature thanks to microscopes – a product of the human mind. To help children watch the microscopic world, we offer best-quality digital and optical microscopes for use at schools, colleges and laboratories. Some of them can be used out in the field. All of them are best-quality products with very good optical parameters. Our offer meets the needs of various users and various tasks. The simple versions are intended for children and aim to get them interested in science. The classical models are for pupils who have just started their adventure with biology in primary school. The advanced microscopes will best serve in situations where high precision and picture quality are a priority. The offer is complemented by an array of accessories, such as slides coverslips, preparatory devices, ready-to-use biological preparations and image-recording devices, i.e. camera.

**TS15411****Reflex arc - cross-section model**

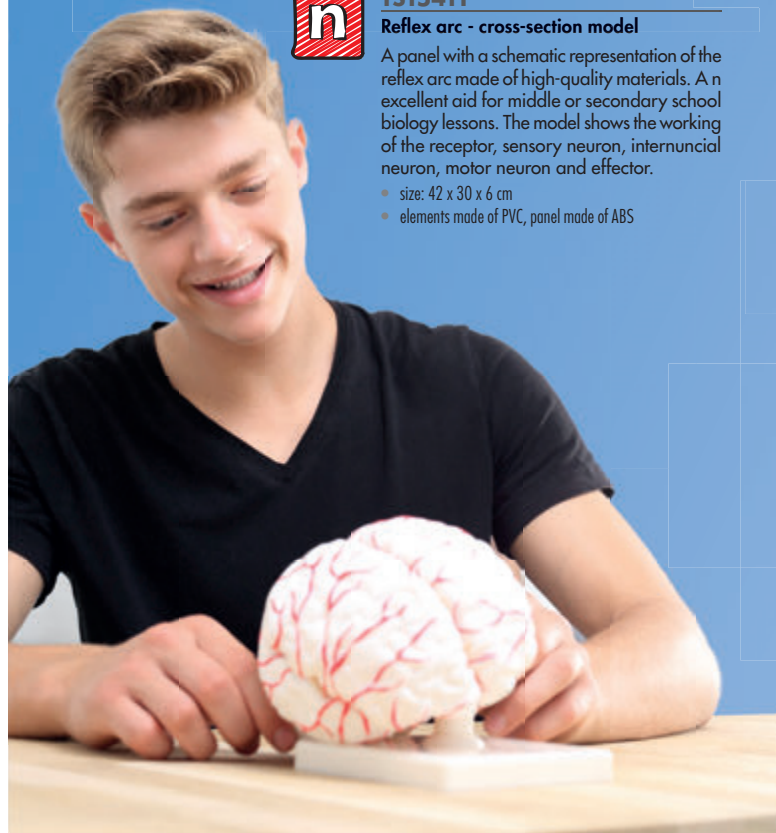

A panel with a schematic representation of the reflex arc made of high-quality materials. A n excellent aid for middle or secondary school biology lessons. The model shows the working of the receptor, sensory neuron, internuncial neuron, motor neuron and effector.

- size: 42 x 30 x 6 cm
- elements made of PVC, panel made of ABS

**QH3308****Spinal cord with nerves**

A teaching aid to show how the reflex arc works i.e. the way of a nerve impulse from the receptor to the sensory neuron to the control centre to the motor neuron to the effector muscle. Made of plastic, it is a great help in biology lessons.

- panel size: 42 x 4.5 x 30 cm

**AM1414****Human brain with arteries.
Anatomical model**

See how the brain is built and learn about its functions.

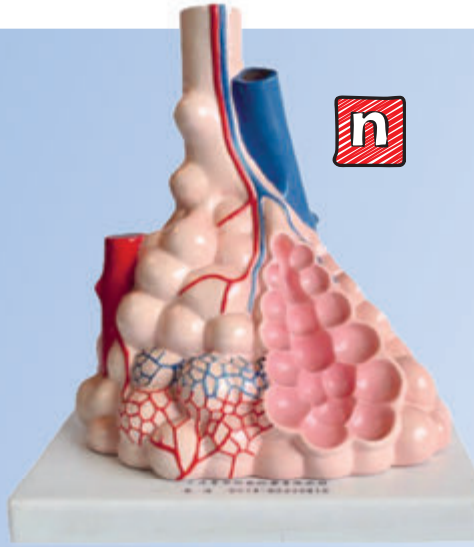

- life-sized
- made of plastic

QH0020

Neuron model

- size: 36 x 23 x 10 cm

QH3306

Pulmonary alveoli

A model of part of a pulmonary lobe showing the alveoli. It will come in useful in secondary school biology classes. It shows all the anatomical details of pulmonary alveoli and bronchioles, as well as of capillary vessels, arterioles and veins.

- size: 21 x 15 x 23 cm

QH0013

Artery structure model

- scale 100:1

AM7120

Lung demonstration model

An aid to explain how lungs get filled and emptied of air thanks to the diaphragm.

- set includes: a plastic jar (ø 20 cm), a rubber disc, 2 balloons

QH0016

Human thoracic organs. Anatomical model

- model includes: larynx, trachea and the bronchi, two-chamber heart, subclavian artery, vena cava, pulmonary artery, thorax, oesophagus, removable lungs, diaphragm
- size: 23 x 34 x 18 cm

**QH0015****Human liver, pancreas and duodenum.
Anatomical model**

- size: 17 x 17 x 22 cm

**QH0014****Human urinary system.
Unisex model**

- 3 pcs
- size: 21 x 13 x 35 cm

**QH0047****Human stomach. Model**

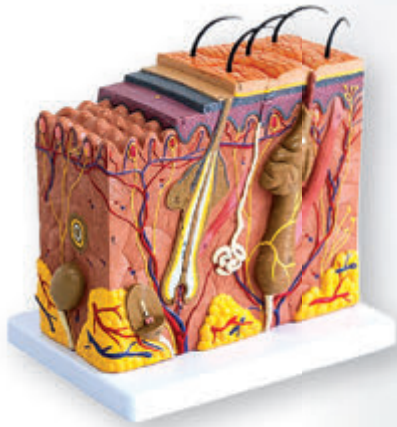

- size: 12 x 12 x 18 cm
- 2 pcs

**HG0002****Kidney nephron and glomerulus.
Anatomical model**

- mounted on a flat base
- includes 3 specific elements: kidney (9.5 x 14 cm), glomerule (8 x 14 cm), nephron (15.5 x 19 cm)

**HG0001****Bone structure. 3D board**

- the board consists of 4 element: periosteum, blood vessels, cancellous bone, cortical bone.
- size: 53 x 38 x 8 cm
- made of PVC
- hand-painted

RV3132
Human skin model

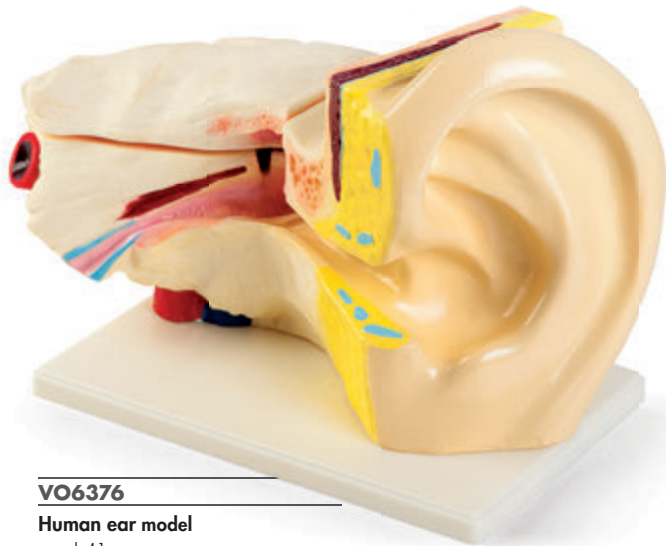

A cross-section model representing in microscopic detail the structure of human skin.

- size: 11.5 x 22 x 21 cm
- scale 70:1

VO6192
Human eye model

- 6 mobile elements
- on a stand
- ø 16 cm, H 21 cm

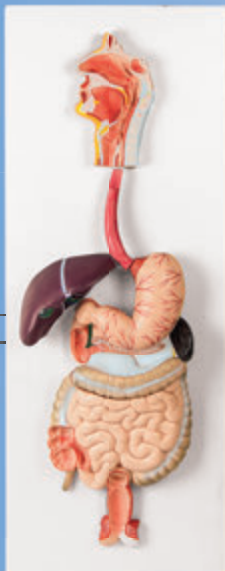

VO6376

- size: 30 x 80 x 6 cm

**QH0018****Digestive system
3D board**

- size: 30 x 80 x 6 cm

**QH0021****Pregnant woman uterus. Model**

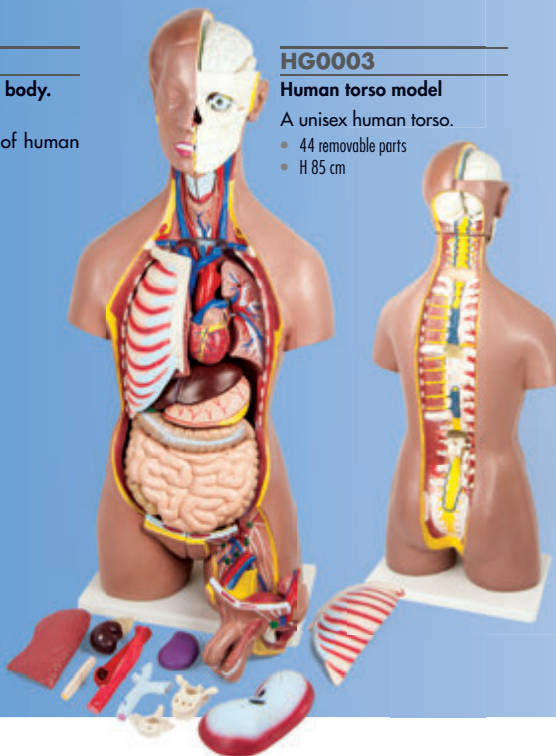

A two-part cross-section model of a uterus in the 40th week of pregnancy.

- size: 40 x 26 x 34 cm

**QH0048****Muscles of human body.
Model**

A general model of human muscular system.

- size: 20 x 17 x 85 cm

**HG0003****Human torso model**

A unisex human torso.

- 44 removable parts
- H 85 cm

**EIO050****Human trunk model**

The model is made of plastic. The organs can be taken out for closer inspection.

- 11 elements; H 50 cm; ages: 6+

QH0023

Human leg muscular system. Demonstration model

Human body. Magnetic board

An educational toy, that helps gain knowledge concerning the structure of human body. The task is to assemble a diagram of each of the systems of human body (bone, muscular, respiratory, digestive, endocrine, urogenital and circulatory system).

Set includes:

- 1 big magnetic board 100 x 60 cm
- 16 magnets with names of human body systems (in english and polish)
- 69 magnets with depictions of human body parts
- box, manual

**BD5302****Human skeleton. Model**

- life-sized (H 170 cm)
- made of plastic
- metal stand with castors

**QH3302****Model of human skeleton left painted**

Muscle origins are marked in red and insertions in blue.

- made of plastic and fixed, on a mobile stand
- need assembly
- life-sized (H 170 cm)

**EI0013****Cranial nerve skull**

Highly detailed finish, collectible quality.

- 9 cm; includes: 39 elements, display stand, manual
- ages: 8 +
- until stock run out

**HG0041****Skull model**

A skull model with a mobile mandible and removable elements.

- size: 22 x 14 x 16 cm; weight 950g

**VO6188****Small human skeleton. Model**

- easy-to-join plastic elements
- H 80 cm

**QH0022****Human vertebral column and pelvis. Model**

- life-sized (25 x 14 x 66 cm)
- flexible

AM1323

The equal mass set

The equal mass set contains samples of tin, aluminum, lead, zinc, copper.

HG0410

Density blocks with hooks

A set of cubes of equal volume made of different metals and alloys eg. Copper, brass, lead, zinc, steel, aluminium.

- cube side: 3.2 cm

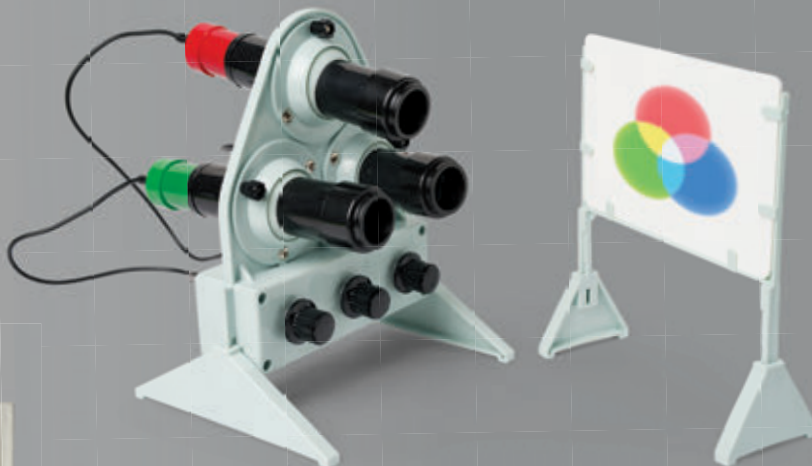

QH0055**Color mixing apparatus**

A special projector using 3 strong low-voltage LED lamps (red, green and blue) in special holders and sockets to ensure adjustment of the angle of

incidence for each colour ray onto the white screen.

- size: 22 x 17 x 16 cm
- wall fasteners and manual included

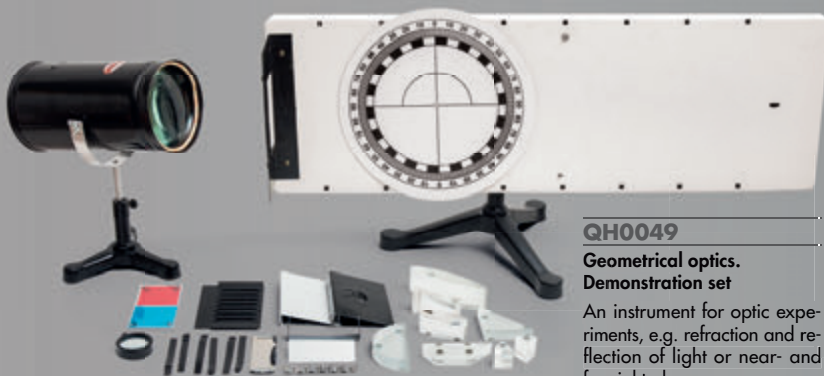

**HG0127****Diffraction grating set**

A set of optical devices to demonstrate the diffraction and interference of light and to obtain its spectrum. The analysis of the location of light and dark diffraction stripes makes it possible to determine the length of the wave falling onto the grating. All the diffraction gratings are made of a plastic frame (5 x 5 cm) and foil (35 x 23 cm) with openings of different shapes and spacing. They can be mounted on special stands or optical benches.

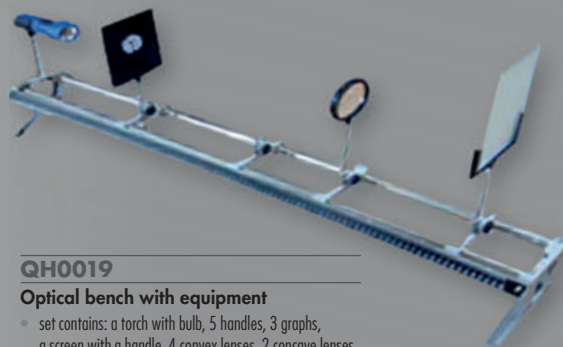

The set consists of 5 gratings:

- with 3 single slits (width 0.05, 0.1, 0.2 mm)
- with 3 double slits of 0.05 mm (spacings 0.2, 0.3, 0.45 mm)
- with single slits, 2 slits, 3 slits, 4 slits, multiple lines (30 and 60 lines/mm, circular apertures (D 0.36 mm), triangular apertures (side 0.3 mm), square apertures (side 0.2 mm), rectangular apertures (0.6 x 0.28 mm), all slits 0.06 mm wide with spacing 0.05 mm)
- with 3 rectangular apertures, each formed by lines intersecting at right angles, number of lines: 20, 40 and 60 respectively
- with round apertures of diameters 0.2, 0.3, 0.4 mm

**QH0049****Geometrical optics.
Demonstration set**

An instrument for optic experiments, e.g. refraction and reflection of light or near- and far-sightedness

- size: 75 x 24 x 37 cm

**QH0019****Optical bench with equipment**

- set contains: a torch with bulb, 5 handles, 3 graphs, a screen with a handle, 4 convex lenses, 2 concave lenses
- size: 101 x 6.5 x 20 cm

AM0914

Set of 6 lenses 38 mm

- 6 lenses D 38 mm
- double-convex, double-concave, flat-convex, flat-concave, concave-convex, convex-concave
- material: glass

AM0913

Set of 6 lenses 50 mm

- 6 lenses D 50 mm
- double-convex, double-concave, flat-convex, flat-concave, concave-convex, convex-concave
- material: glass

HG0091

Wooden lens holder

A universal holder for supporting lenses during presentations and experiments in optics. Made of wood, it has a height-adjustable arm with a wing bolt lock. The V-shaped slot will hold lenses from 38 to 50 mm in diameter.

- size: 9.7 x 4.5 x 15 cm

HG0089

Laser refraction tank

The model illustrates how a beam of light gets reflected when passing through a different medium (water in an acrylic tank) and how it gets reflected. The transparent tank with water has a scale on its back wall (360°) and a movable arm with a laser activated with a switch

- size: disk D 16 cm, H 25 cm
- the laser requires a battery

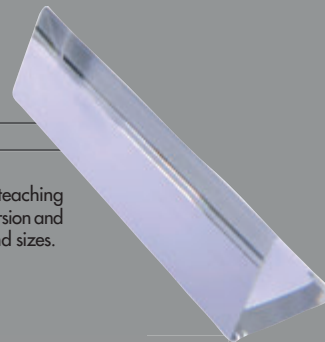

AM0972

Equilateral prism glass

Prisms are essential tools for teaching about light refraction and dispersion and come in a variety of shapes and sizes.

- size: 2,5 x 10 cm

QH2079

Set of prisms

„A set of acrylic prisms and lenses with magnets encased for easy fastening on a magnetic board. The elements can be used to explore the nature of light (refraction, dispersion, internal reflection). The plastic dial with degree markings can be used together with other elements to experiment more with optics.

The set contains 8 optical accessories:

- flat-convex lens 4 x 8 x 1 cm;
- right-angled triangular prism 6 x 6 x 1 cm;
- double-convex lens 4.5 x 13 x 1 cm;
- double-concave lens 5 x 13 x 1 cm;
- convex-concave lens 4.5 x 13 x 1 cm;
- flat-concave lens 1 x 6.5 x 1 cm;
- convex-flat lens 1 x 6.5 x 1 cm;
- rectangular prism 2 x 13 x 1 cm
- 13 cm plastic dial with degree markings

QH0056

Convex lens and concave lens

Spherical and convex spherical mirror on separate bases.

- dia. 10 cm, 2 pcs.

**QH0040****Rolling pendulum**

- size: 23 x 10 x 41 cm

**QH0038****Thermal expansion.
Demonstration set**

A demonstration set for thermal expansion of solids.

- made of metal

**HG0008****Van de Graaff generator**

- set includes: a conical and a spherical conductor with a spike and a stand, a spherical conductor with an insulated handle, an electrostatic mill, a brush
- manual drive
- size: H 74 cm, dome ø 26.5 cm

**QH0029****Electrostatic pendulum**

- 2 pcs
- H 30 cm

**QH0031****Archimedes' principle.
Demonstration set**

- set includes: 2 cylinders and a spring scale
- size: 17.5 x 4 x 7 cm

**HG0130****Water electrolysis
experiment device**

An electrolyzer in the form of a cylindrical plexiglass container with a raised bottom with two banana sockets (+ and -) underneath. These are connected with electrodes threaded through rubber stoppers of respective colours placed in the inlets of two acrylic test tubes with scales marked.

- size: 12 x 8.5 cm.

HG0126

Ripple tank

A device for demonstration of various waves on water surface. Intended for projecting images on a wall (projector) or the ceiling (stroboscope).

- size: 35 x 28 x 6.4 cm; tank size: 28 x 27 x 3.5 cm
power supply DC 6V-9V

HG0147

Barton's pendulum

An aid to demonstrate the mechanical resonance of vibrations. The resonance pendulum consists of 7 balls hanging from the same base.

- size: 456 x 100 x 330 mm, weight 1.5 kg

HG0146

Mathematical pendulum

The model demonstrates the oscillation of an object of point form after setting it swinging and

determining the deflection angle, amplitude of swings and period.

- H 122 cm, weight 5.4 kg

QH0053

Uniform motion and uniformly accelerated motion. Demonstration set

A device for exploring the properties of the uniform motion and the uniformly accelerated motion during science lessons.

- size: 110 x 20 x 24 cm

QH0032

Lever with stand

A demonstration set for the uniformly accelerated motion.

- size: 49 x 8.5 x 25 cm

**HG0093****Centrifugal force kit**

A centrifuge can be used in physical experiments. Combined with other sets, it may come useful in experiments in acoustics or thermodynamics. The rotational velocity of the spindle depends on the velocity of the manually-powered pulley wheel. The machine can be used both vertically and horizontally. The kit helps explain the processes taking place in a washing machine while spinning wet clothes (spin dryer), simulate a lab centrifuge (centrifugal separator), demonstrate directly how centrifugal force works (Watt regulator with a shutter valve in cross section).

- 5 elements: centrifugal apparatus, 2 test tubes with caps, Watt regulator with a shutter valve model, centrifuge
- size: 23.5 x 11.5 x 47.5 cm

**HG0740****Friction on an Inclined**

This wooden inclined plane with adjustable tilt angle has a metal pulley at the upper end which holds a metal pan for weights. The weights exert a force on the body on the plane. The attached protractor has two scales (in degrees and centimetres) for measurements. Experiments with three kinds of blocks (of different size, weight and surface) help demonstrate how these affect the movement of blocks depends on the tilt and weights on the pan.

- 2 wooden boards, 1 metal pulley, 1 metal pan, 1 hook
- size: 83 x 23 x 34 cm

**HG0099****Pascal's pressure sphere demonstration model**

A device to present Pascal's law in action. It is made of a steel sphere connected to a tubular manual pump. The sphere is pierced with small holes. After filling it with water and pushing the piston the water squirts out in even jets.

- L 35-53 cm, sphere D 8 cm, sphere V 0.2 l; 9-10 holes

**HG0096****Boyle's law demonstration model**

The device demonstrates Boyle's law i.e. it shows a relationship between the pressure and volume of air at a constant temperature. The user can experiment with the elasticity of a measured amount of gas. Turning the handle compresses the air. The volume, temperature and pressure can be read from the display screen on the scales.

- box dimensions 24 x 19 x 15 cm

HG0125**Newton's tube**

An apparatus for demonstrating how the motion of objects follows Newton's second law of motion.

- size: 5.8 x 95 cm; the tube contains a magnet, metal coin and a feather

**HG0094****Gyroscope - demonstration model**

The gyroscope model demonstrates the conservation of the orientation of its axis of rotation when no moments of external forces are present. It also shows the gyroscope's reaction to a nonzero moment of an external force. The device is made of a metal circle placed on a steel axis with horizontal holes for threading a string used to set the circle rotating by pulling. The axis has two adjustable tapered roller bearings. In the set there are also two stands with support arms. One allows the gyroscope to rotate around the vertical axis, the other allows a tilt. Also, the string with a T-handle is included.

- 4 elements:
gyroscope (10.7 x 10 x 17 cm, weight 175 g), 2 stands, string 60 cm with a handle

**HG0077****Vacuum bell jar**

A vacuum bell jar for experiments in low pressure conditions; made of transparent plastic cloche and a base with a rubber sealing ring. It has an electric bell and a hand pump.

- base 19 x 25 cm; cloche D 15 cm; material: plastic; age: 14+

RV1007

Voltmeter DC 0~15 V

- measurement range: 0-5 V, accuracy $\pm 2.5\%$ FS, sensitivity: 1 mA, dimensions: 133 x 97 x 100 mm, weight 0.3 kg, scales: 0-5 V; 0-3-15 V; 0-5-15 V; -1-0-3 V; -5-0-15 V

RV1002

Ammeter AC 0-1 A

- measurement range: 0-1 A, accuracy $\pm 2.5\%$ FS, ripple voltage: 30 mV, dimensions: 133 x 97 x 100 mm, weight 0.4 kg, scales: 0-1A, 0-5A, 0-0.6A-3A

TS15090

Multimeter

- voltmeter and ammeter
- separate 10 A socket
- battery-powered (battery not included)

HG3005

Lab power supply

A very accurate power supply with protection against high temperature, short circuit, overload and damage. The output voltage and current are controlled steplessly with coarse and fine knobs - separately for the output current and voltage. The device operates in „constant current“ (CC) and „constant voltage“ (CV) modes. General specifications:

- output voltage 0-30 V, output current 0-5 A
- voltage and current stabilization
- ripple noise 0.5 mV rms
- simultaneous reading of amperage and voltage for each output
- digital display (2 x LCD - 220V)
- fan
- LED indicator

RV1008

Voltmeter AC 0-3 V; 0-5 V, 0-15 V

- measurement range: 0-3 V; 0-5 V, 0-15 V, accuracy $\pm 2.5\%$ FS, dimensions: 133 x 97 x 100 mm, weight 0.3 kg, scales: 0-5 V; 0-3V-15 V; 0-5V-15 V

RV1001

Ammeter DC -0,2~0~0,6 A; -1~0~3 A

- measurement range: -0,2~0~0,6 A; -1~0~3 A, accuracy $\pm 2.5\%$ FS, ripple voltage: 75 mV, dimensions: 133 x 97 x 100 mm, weight 0.3 kg, scales: 0-1A, 0-5A

**QH0052****Mechanics. Mobile laboratory**

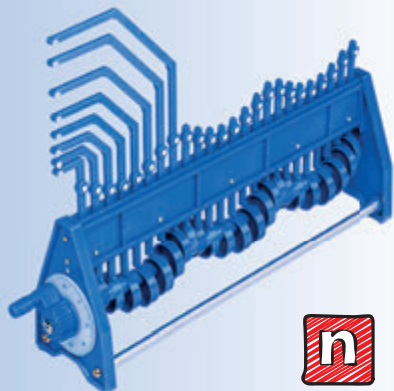

A set for experiments with mechanics.

- set includes: plastic container, a ballistic gun, a lab container, a steel ball, a spirit level, six 100 g weights, a tribometer, a dynamometer, a ruler, a mathematical pendulum, 3 bodies of different masses

**HG0005****Block Circuit Board**

A demonstration set of electric circuits.

- size: 36 x 36 x 5.5 cm

HG0097

**Wave machine.
Transverse and longitudinal waves**

„An aid to demonstrate the phenomenon of transverse and longitudinal waves. Very useful in observation and exploration of such issues connected with a wave as its length, frequency, amplitude, reflection and period. The machine consists of a shaft with a crank at its end. Rotation of the shaft sets the vertical rods with white spots in motion. Additionally, 8 rods bent at the same given angle to help observe how both types of waves are formed.

- size: 50 x 12 x 30 cm; weight 0.85 kg; material: plastic

QH2115

Magdeburg hemispheres

2 hemispheres, with handles attached, for demonstrating the operation of atmospheric pressure when the two elements are pressed together so that the rims fit together and the air is next sucked out.

- D 12 cm; made of plastic and rubber

HG0095

Lenz's Law

The model consists of two metal loops fixed to the opposite ends of an aluminium bar which can move freely on a pin. One loop is complete, the other one split. When the magnetic flux changes, according to Lenz's law current is induced in the complete loop to oppose the change.

- size: 20.3 x 15.2 x 7.6 cm

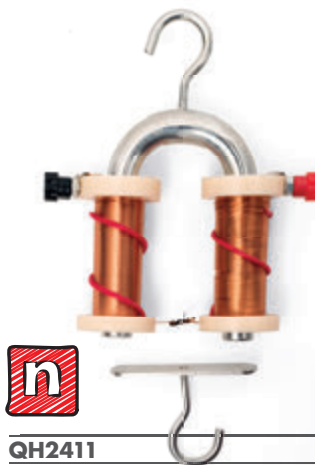

QH2410

Induction coils

An aid to explore electromagnetic induction and explain how a transformer works. The primary coils is made of enamelled copper wire of large diameter and very low resistance (ca 0.5 ohm). The secondary coil is wound with fine enamelled wire with resistance 100 ohm. Each coil has two 4 mm sockets.

- size: 21 x 15 x 23 cm

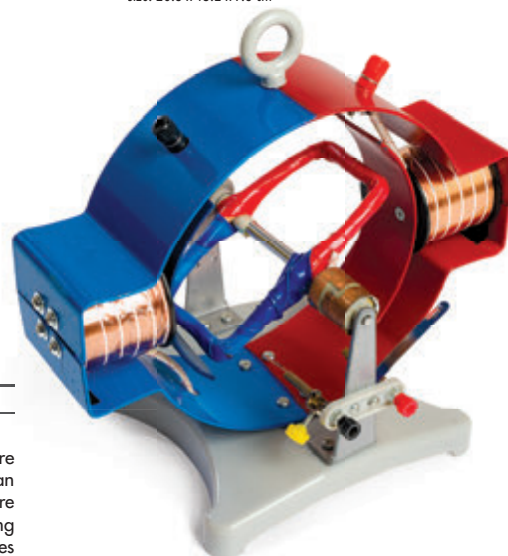

QH2411

Electromagnet

The electromagnet consists of a coil of wire wrapped around a ferromagnetic core in an open magnetic circuit. On the outer layer there are a few rubber coils to indicate the winding direction. The terminals allow external devices to be connected in series or in parallel. The electromagnet can present the relationship between magnetism and electricity. It induces a magnetic field when electric current is passed through it.

- size: 15 x 12 x 3.5 cm

QH0035

- size: 18 x 18 x 21 cm

**QH2030****Magnetic field lines**

- size: 17.5 x 17.5 x 20.5 cm
- the kit includes a bar magnet

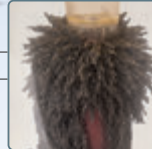

**QH0034****U-shape Magnet**

- made of chrome steel

**AM6018****Iron filings in a vial**

Help students understand the force of magnetism.

- 63,5 g

**EI0052****Magnetic attractions kit**

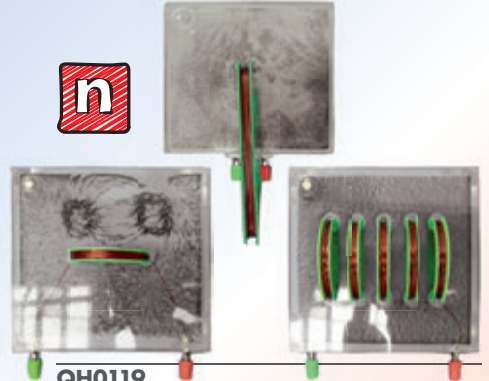

An assortment of magnets and magnetic objects for exploring magnetism in-depth.

- 18 elements, ages: 8+

**QH0119****Magnetic field around a wire - demonstration set**

The set consists of three devices for the presentation of magnetic field lines around an electrified wire (rectilinear, circular, coil);

- 3 pcs; size: 107 x 97 x 10 mm

**QH0050****Small magnetic needles**

The set contains 10 miniature compass needles on stands.

- 10 pcs; stainless steel
- size: 3 x 2.5 x 3.7 cm

maps NS series

Series of large Nowa Szkola wall maps showing all continents separately and map of the world.

High quality of printing provides great transparency.

Maps show in a clear way:

Current territories of countries are marked in colours as well as problematic territories, capitals and larger cities

- natural biosphere of the Earth (rain forest, deciduous forest, taiga, tundra, mountain areas, ice-sheets, savannas, deserts, coral atolls), agricultural and pastoral areas
- physical map include various photographs showing characteristic landscapes and natural wonders.

- political maps are provided with a description of the state: flag, emblem, official language, capital, political system, area population, monetary unit converted into PLN, dominant religion, time zone, internet domain, codes (car, airplane, phone), GDP per person and credit rating of its current economic situation, and data on personal security threats in public places.

If you are interested in having one of our maps, please contact us. We will prepare an individual version of the map in the chosen language.

Or on special request we will provide a map in the language of your choice.

logicubes

ZEBRA

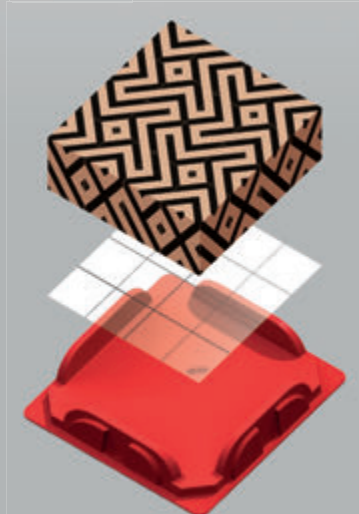

These printed wooden cubes are a complete educational set which develops logical and spatial thinking and thus it prepares children for elementary programming. The game comes in three versions, each meeting different needs and skills of the users. The complete set comprises cubes, reference charts, grid transparencies and self-evaluation charts, and their number depends on the level of difficulty. Simple rules, the simple structure of the set and the self-evaluation charts develop independent activity irrespective of age. All the cubes have the same number and pattern configurations. They are elements of one of 30 suggested jigsaws. We offer 3 sets of cubes (of 9, 16 or 25 pieces). The worksheets are numbered according to the level of difficulty. The cubes can be arranged freely on the table or on the tray provided. More demanding players will be interested in the 3D version (with worksheets and a tray).

NS2970**Fairy tale stories. Worksheets**

The set contains 48 cards with characteristic symbols from various fairy-tales and stories.

Cardboard cards (11,5 x 8 cm) with rounded corners in a cardboard box.

Generally, the cards are meant to be arranged so as to construct a logical story. The set contains 48 cards with imagery referring to widely known European fairy tales. Flashcard activities may be enhanced by introducing hand puppets and/or musical instruments. Children can work individually, in pairs or in a group. Suggested uses:

- an adult tells a story contained in a set of pictures. The child listens and then, looking at the same set, tries to repeat as many details as possible;
- a child draws three cards and tells the stories which they represent; the difficulty should be graded with more cards added; to add variety to the game, mul-

- tisensual elements can be introduced (hand-puppets, musical instruments);
- a child draws five cards and tells its own story; the number of cards should be adjusted to the child's abilities; multisensual elements can be introduced (hand-puppets, musical instruments);
- version for a group: the first child draws a card, chooses one musical instrument, starts to tell a story and play. The subsequent players draw their cards and continue the story, repeating the story so far. They also have to reconstruct the sounds played by the first child.

The activities suggested can be adjusted to the needs, age, abilities or the number of players by modifying the rules as necessary.

Before starting the game all cards should be laid out on the table so as to familiarize them with the symbolic

meanings of the pictures and check their knowledge of the fairy tales.

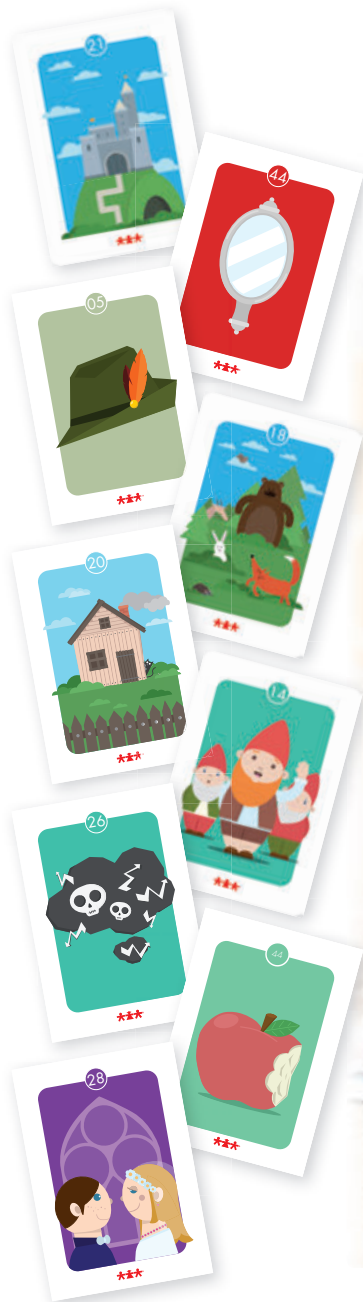

Flashcards for developing language skills:

- help develop logical thinking, and causal reasoning;
- help develop descriptive and narrative skills;
- very useful in introducing, practising and consolidating new vocabulary;
- develop creativity and artistic expression.

Time for English

Time for English is a set of educational materials for teaching English to 3-8 year old children. Its innovative character is provided by its unique combination of specially selected 'language teaching tools' such as multi-sensory toys, educational aids, audio materials, and songs with sets of instructions for teachers to guide them through the process of organizing lively, game-packed and involving English language teaching activities. The educational aids and audio materials have been specially designed to provide a rich variety of tasks built around

selected topics, selected vocabulary and associated structures. This approach ensures the compatibility of all of the materials and guarantees great results: the children play, are fully involved in activities, respond spontaneously AND learn English at the same time. The whole set contains over 120 games and activities making use of the Time for English educational aids.

The Time for English set has been tested in preschools and early year primary school and has been proven to be very successful with groups of different sizes.

An example of the topic

FRUIT

The following materials illustrate the compatibility of educational aids to teach children: the English names of fruit, colours, numbers, English instructions to make a fruit salad, fruit art projects connected with printing and English songs which consolidate all of the presented language.

Wooden puppets: family members

The wooden puppets can be decorated and become family members speaking English. It's a fun activity combining art tasks with drama and English language teaching.

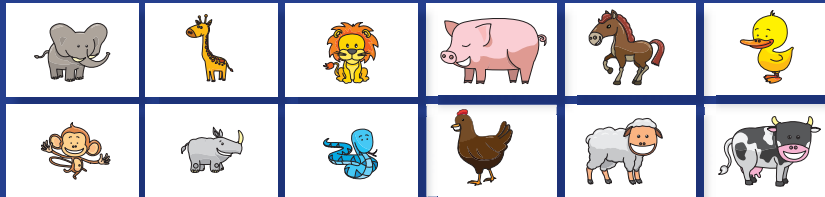

Zoo beads

Children love them and they are motivated to learn the names of zoo animals, their colours and numbers. The multitude of animals in the set helps to keep all the children of all sizes of group engaged.

Animal-shaped counters

72 of these little farm animals can be named, touched, hidden in the palms of little hands, counted, grouped into sets, and used for constructing farms. All of these activities are performed in English and for the purpose of learning English.

Large flashcards for the topics: farm animals, safari animals, clothes

Flashcards are a basic tool for teaching English to children. The large colourful pictures help the children to remember the words and to introduce English vocabulary using only English.

Game:
Dressing the Cats

This is a game that children also like to play with in their free time. The little wheel of chance introduces an element of chance, luck and surprise, which helps to keep the children focused on the task and teaches them English words.

Story cards:
daily routines

The sets of cards create opportunities for sequencing, constructing stories, naming in English and acting out daily activities.

Morphun blocks 3D

Morphun blocks provide opportunities for creating sequences, rhythms, word groups and longer expressions.

Behaviour chart

NS0301

Behaviour chart is an agreement about rules of class conduct. It is an element of pedagogical intervention at a basic level. The rules are drawn up with pupils, which helps raise a child's awareness of his or her responsibility for their own behaviour. Although class integration is very important at the primary school level, many pupils have problems with developing bonds and the stressful school reality can hinder the development of interpersonal relationships. Our Class Contract may prove a remedy to this. The behaviour chart can be used by the teacher and/or pupils. The contract should raise the sense of responsibility resulting from co-operation and taking decisions together. It has a potential of bonding the group together and creating a good rapport through honest self-evaluation. It should facilitate comprehensive development of pupils and make it possible for the teacher to better observe each pupil in various task situations in order to get

to know his or her character better. The contract is an in-class system of evaluation and a code of conduct. It includes the following commitments:

- I come to lessons on time (*punctuality*).
- I do not disturb others at work;
- I will be quiet, listen to the teacher and carry out his instructions (*behaviour*).
- I come to the lesson prepared and with all necessary books, notebooks and school equipment (*preparedness*).
- I actively participate in lessons – I will raise my hand when wishing to say something (*activity*).
- I behave in a cultured way in my relations with my teachers and schoolmates (*good manners*).
- I learn and do my homework systematically. (*homework*).
- I keep my desk and classroom in order (*cleanness and order*).
- I observe the rules of the group (*co-operation*).

Calendar

This educational tapestry calendar is essential in every classroom. It is large format and has pockets for cards with the names of the months and the days of the week. 6 soft appliques presenting the weather conditions typical of a given season help children observe in which months the seasons change. By buttoning on two arrows one can show the current month and the day of the week, which is an extra manipulation exercise. The cards with names can be printed out or handwritten during a groupwork activity. Optionally, cards with foreign language names for the days and months can be prepared, which makes the calendar very useful for a foreign language teacher.

hand & finger puppets

The bunch of colourful fairy-tale characters in the form of hand puppets will take a young puppeteer into the world of fantasy to impersonate a favourite character or prepare a play at school or at home. The puppets develop imagination, creativity, self-expression, listening and manual skills. They also help overcome shyness and anxiety, and generally manage emotions. They provide an excellent opportunity to

play with parents and to build bonds while performing various social roles. The puppets have been divided thematically into fairy-tale characters and the most popular professions (policeman, cook, firefighter). All the puppets have plastic heads and the other elements are made of velour, fleece or satin. Thanks to the small size and weight they can be used even by the youngest and carried practically everywhere.

The idea behind the chore charts was to give variety to games and plays through extension with new variants. These are created in co-operation with teachers, who have practical knowledge of the school and preschool environments. The charts may facilitate teacher-run activities but also lend themselves to individual play at home.

ZEBRA

These printed wooden cubes are a complete educational set which develops logical and spatial thinking and thus it prepares children for elementary programming. The game comes in three versions, each meeting different needs and skills of the users. The complete set comprises cubes, reference charts, grid transparencies and self-evaluation charts, and their number depends on the level of difficulty. Simple rules, the simple structure of the set and the self-evaluation charts develop independent activity irrespective of age. All the cubes have the same number and pattern configurations. They are elements of one of 30 suggested jigsaws. We offer 3 sets of cubes (of 9, 16 or 25 pieces). The worksheets are numbered according to the level of difficulty. The cubes can be arranged freely on the table or on the tray provided. More demanding players will be interested in the 3D version (with worksheets and a tray).
