we grow with you

School furniture

MOBeduc

We would like to thank you for your interest in our company, products and solutions.

**MOBeduc** produces the best product on the market for nursery and primary school. But our philosophy goes far beyond this idea, our philosophy is reflected in everything we do: for us primary education is our challenge and we must protect and care for it.

On our catalog you will find a collection of high quality articles (around 200 products), and also solutions that will allow you to give the best answer to all your needs of space and use. We are prepared to develop and produce your taylor-made furniture.

We invite you to have a look to all the information written on this catalog, and, in case you need further information, do not hesitate to contact us.

THANKS

# Commitment

TECNALIA, Technological Center specialized in furniture, has certified with a stamp of quality all the articles made by **MOBeduc**.

For the concession of this mentioned stamp of quality, TECNALIA has submitted all the materials (raw materials and finished product) to safety and strength tests.

Due to the result of these analyses, TECNALIA certifies that **MOBeduc**'s furnitures comply with all the standards and specifications for infantile and school furniture and that these furnitures have reached maximum levels of quality and safety.

**MOBeduc** is committed to sustainable development and environmental protection, by the granting of the UNE-EN ISO 14001 "Environmental Management System", which ensures minimal environmental impact, reducing consumption energy and raw materials, improving the management of waste from the production process and optimize the management of the company.

We take care for your privacy and your data. We will never give your data to third parties as we comply with all requirements of Law 15/1999.

# Our company

**MOBeduc**, located in Navarra (Spain) is a company with a great experience on the nursery and primary market selling in Spain through our splendid commercial network. Our company will take care of you with the maximum professionalism.

Our general target is the market for nursery and school at all ages, although we are specialised at ages from 0 to 6 years where the quality requirements are harder.

We are able to provide you customised solutions. Why does our company provide customised solutions? Due to the fact that all the needs are different; so that means that for each need must be a different solution that we can give to you. We study and analyze that each of our product is efficient according to your needs. It is always cheaper, useful and more satisfactory to have a logical solution.

**MOBeduc** has been working for a long of time in the area of Research and Development to improve our solutions to your needs. We have three divisions:

- Advice.
- Standard Furniture.
- Taylor made Furniture.

First we analyze your needs, later we advise and propose you the suitable solutions. We can find these solution on our standard furniture brochure (around 200 articles) or through our taylor made furniture. In any case, **MOBeduc** will find the best furniture solution.

Because we produce our furniture according to pedagogical concepts.

# Our technical characteristics

All **MOBeduc** furniture is manufactured from easy clean 19 mm beech melamine faced particleboard chipboard with 2 mm PVC edging on all facing edges in different colours.

**MOBeduc** furniture has no sharp edges making it extra safe for children.

## Feets and castors

We offer feets in two different heights: 4 cm and 8 cm high, both with a diameter of 4 cm. All our feets are made from black PVC.

◀ Height adjustable feets are available for uneven floors and surfaces.

◀ Castors are either fixed or swivel with brake options.

## Colours

We offer a wide range of colours to give your personal touch to our furniture.

## Door handles

Door handles are made in a flexible soft polymer to prevent children to be hurt when falling.

\*Optional lock on all the doors of our furniture

## Plastic coat hook

We can provide our clients with fixed and revolving hooks.

## Trays

Plastic trays can supply in two different heights and with a wide range of colors.  
All our furniture trays have the option to combine both trays either.

Ref. 800887

Ref. 800888

## Shelves

Our wardrobes have adjustable shelves attached to the sides by special fixings capable of sustaining horizontal stress.

The height of the shelves can be changed by altering the position of the fixing points.

## Anti-finger trap door

The hinges are hung inside the wardrobe to prevent finger trapping for maximum safety.

# Heights

# Services

## Transport

Delivery service is available through international transport companies. We compromise that your order will arrive with the maximum guarantee and security.

## Guaranteed after sales

Our products have 5 year warranty, except damage caused by bad use or malicious damage.

We have no limitations on the replenishment of materials, and we can guarantee, almost for life, that you will have all those replacement or substitute materials you need.

## Customer service

The priority aim is you.

We want to give you solutions in order that your new installation on your Primary School would be of maximum efficiency and performance. To achieve this, we offer all our technical and commercial support to prepare the best project for your school with the best solutions.

Once we finish your installation, we keep our communication with you as we still have many things to talk about. We count on you.

# Low storage furniture - 2 horizontal compartments

[www.mobeduc.com](http://www.mobeduc.com)

## Ref.: 600215

Low storage furniture, 3 horizontal compartments. Manufactured from 19 mm beech melamine, except rear (10mm) and 2mm PVC edges, finished for both sides. We offer feet in two different heights: 4 cm and 8 cm high. Height adjustable feet are available for uneven floors and surfaces and also feet can be removed from the furniture.

Removable furniture with rounded edges to prevent cuts or wounds. Our furniture has no sharp edges making it extra safe for children.

Assembly through sleeves with zoom system, ensuring solid and rigid union. Adjustable shelves attached to the sides by special fixings capable of sustaining stress.

MOBeduc complies with TECNALIA Certification (Safety & Quality standards) in the manufacture of nursery and primary furniture.

TECNALIA offers a global service to the furniture sector by testing and certifying the behaviour of finished furniture and of each of its components with the following methodology:

- Initial inspection of our system of production and control.
- Initial test about the type of product.
- Surveillance, monitoring and evaluation of the quality system.
- Test of raw materials using random samples
- Test of finished product using random samples.

### Ref.: 600214

Low vertical storage furniture with 3 bays with trays. Manufactured from 19 mm beech melamine, except rear (10mm) and 2mm PVC edges, finished for both sides. We offer feet in two different heights: 4 cm and 8 cm high. Height adjustable feet are available for uneven floors and surfaces and also feet can be removed from the furniture.

Removable furniture with rounded edges to prevent cuts or wounds. Our furniture has no sharp edges making it extra safe for children.

Trays included. Different combinations can be made: two small trays can be replaced by a big one.

Assembly through sleeves with zoom system, ensuring solid and rigid union.

MOBeduc complies with TECNALIA Certification (Safety & Quality standards) in the manufacture of nursery and primary furniture.

TECNALIA offers a global service to the furniture sector by testing and certifying the behaviour of finished furniture and of each of its components with the following methodology:

- Initial inspection of our system of production and control.
- Initial test about the type of product.
- Surveillance, monitoring and evaluation of the quality system.
- Test of raw materials using random samples
- Test of finished product using random samples.

### Ref.: 600816

Wardrobe (1 door) and 1 bay of trays. Manufactured from 19 mm beech melamine, except rear (10mm), doors (16mm) and 2mm PVC edges, finished for both sides. We offer feet in two different heights: 4 cm and 8 cm high. Height adjustable feet are available for uneven floors and surfaces and also feet can be removed from the furniture.

Trays included. Different combinations can be made: two small trays can be replaced by a big one.

Internal doors to prevent finger trapping for maximum safety and door handles are made in a flexible soft polymer to prevent children to be hurt when falling.

Removable furniture with rounded edges to prevent cuts or wounds. Our furniture has no sharp edges making it extra safe for children.

Assembly through sleeves with zoom system, ensuring solid and rigid union. Adjustable shelves attached to the sides by special fixings capable of sustaining stress.

MOBeduc complies with TECNALIA Certification (Safety & Quality standards) in the manufacture of nursery and primary furniture.

TECNALIA offers a global service to the furniture sector by testing and certifying the behaviour of finished furniture and of each of its components with the following methodology:

- Initial inspection of our system of production and control.
- Initial test about the type of product.
- Surveillance, monitoring and evaluation of the quality system.
- Test of raw materials using random samples.
- Test of samples.

## Wardrobe (4 doors)

### Ref.: 600309

Wardrobe (4 doors). Manufactured from 19 mm beech melamine, except rear (10 mm), doors (16 mm) and 2 mm PVC edges, finished for both sides. We offer feet in two different heights: 4 cm and 8 cm high. Height adjustable feet are available for uneven floors and surfaces and also feet can be removed from the furniture. Internal doors to prevent finger trapping for maximum safety and door handles are made in a flexible soft polymer to prevent children from being hurt when falling. Removable furniture with rounded edges to prevent cuts or wounds. Our furniture has no sharp edges making it extra safe for children.

Assembly through sleeves with zoom system, ensuring solid and rigid union. Adjustable shelves attached to the sides by special fixings capable of sustaining stress.

MOBeduc complies with TECNALIA Certification (Safety & Quality standards) in the manufacture of nursery and primary furniture.

TECNALIA offers a global service to the furniture sector by testing and certifying the behaviour of finished furniture and of each of its components with the following methodology:

- Initial inspection of our system of production and control.
- Initial test about the type of product.
- Surveillance, monitoring and evaluation of the quality system.
- Test of raw materials using random samples.
- Test of finished product using random samples.

### Ref.: 600404

High wardrobe and shelves. Manufactured from 19 mm beech melamine, except rear (10mm), doors (16mm) and 2mm PVC edges, finished for both sides. We offer feet in two different heights: 4 cm and 8 cm high. Height adjustable feet are available for uneven floors and surfaces and also feet can be removed from the furniture.

Internal doors to prevent finger trapping for maximum safety and door handles are made in a flexible soft polymer to prevent children to be hurt when falling. Removable furniture with rounded edges to prevent cuts or wounds. Our furniture has no sharp edges making it extra safe for children.

Assembly through sleeves with zoom system, ensuring solid and rigid union. Adjustable shelves attached to the sides by special fixings capable of sustaining stress.

For complete safe, this furniture must be screwed to the wall.

MOBeduc complies with TECNALIA Certification (Safety & Quality standards) in the manufacture of nursery and primary furniture.

TECNALIA offers a global service to the furniture sector by testing and certifying the behaviour of finished furniture and of each of its components with the following methodology:

- Initial inspection of our system of production and control.
- Initial test about the type of product.
- Surveillance, monitoring and evaluation of the quality system.
- Test of raw materials using random samples.
- Test of finished product using random samples.

Set of 2 lockers, each locker with 1 shelf and 2 hooks, manufactured from 19 mm beech melamine, except rear (10 mm), doors (16 mm) and 2 mm PVC edges, finished for both sides. We offer feet in two different heights: 4 cm and 8 cm high. Height adjustable feet are available for uneven floors and surfaces. Hooks made of polypropylene with rounded. Internal doors to prevent finger trapping for maximum safety and door handles are made in a flexible soft polymer to prevent children to be hurt when falling. Each door has lock with 2 keys (included). These locks can be opened with master key. Removable furniture with rounded edges to prevent cuts or wounds. Our furniture has no sharp edges making it extra safe for children. Assembly through sleeves with zoon system, ensuring solid and rigid union. Adjustable shelves attached to the sides by special fixing capable of sustaining stress. MOBeduc complies with TECNALIA Certification (Safety & Quality standards) in the manufacture of nursery and primary furniture. Height adjustable feet are available for uneven floors and surfaces.

Trays included. Different combinations can be made: two small trays can be replaced by a big one.

Removable furniture with rounded edges to prevent cuts or wounds. Our furniture has no sharp edges making it extra safe for children.

Assembly through sleeves with zoom system, ensuring solid and rigid union.

MOBeduc complies with TECNALIA Certification (Safety & Quality standards) in the manufacture of nursery and primary furniture.

TECNALIA offers a global service to the furniture sector by testing and certifying the behaviour of finished furniture and of each of its components with the following methodology:

- Initial inspection of our system of production and control.
- Initial test about the type of product.
- Surveillance, monitoring and evaluation of the quality system.
- Test of raw materials using random samples
- Test of finished product using random samples.
